

Unlock Asset Register — UI Implementation Spec (Demo, non-functional)

1) Scope & Goals

- **Goal:** Show a polished, investor-friendly **Asset Register** that consolidates everything an investor owns/owes, with evidence and reconciliation states, ready for manual input and CSV/AI imports (demo only).
- **Out of scope:** Live pricing, real imports, persistence, auth, or backend work. This demo is **UI/UX only**.

2) Global UX

- **Theme:** Re-use the existing Unlock theme
- **Typography:** Clean system/Inter-style sans; compact but readable.
- **Colour tokens:** Brand (cool blue), Accent (mint), Warning (amber), Danger (rose).
- **Responsiveness:** Works at laptop widths ($\geq 1200\text{px}$). Graceful stack on tablet.
- **Accessibility:** Keyboard focus rings; sufficient contrast; meaningful labels; skip-to-content.

3) Screen Map

1. Asset Register (main)

- Left **Sidebar** with context, filters, quick actions.
- Top **Header** with search, currency, reconciled state, export/print.
- KPI **Tiles** (6).

- **Tabs:**
 - **Holdings Register** (primary)
 - **Targets & Bands**
 - **Transactions**
 - **Documents**
 - **Reconciliation**
 - **Household**
- **Detail Drawers** (open from “View”): Listed asset & Property variants.
- **Lightbox** (Documents preview).
- 2. **Add / Intake screens** (standalone for demo)
 - **Classic intake** (two-pane, tile left, form right).
 - **Creative intake** (Kubera-style: big tiles, command palette, stepper).

4) Asset Register (main) — Detailed Spec

4.1 Sidebar (fixed, left)

- **Brand & title:** “Unlock • Asset Register”.
- **Valuation snapshot:**
 - “As at: *DD Mon YYYY*” (static text).
 - Chip: “EOD prices • GBP”.
 - Line note: “Last reconcile: *Oct 2025* (Vanguard, AJ Bell). Pending: Trading 212.”
- **Entities (chips):** Personal (100%), Spouse (—), Ltd (—).

- **Wrappers (chips):** ISA, SIPP, GIA, Personal.
- **Custodians/Wallets (chips):** Vanguard Investor UK, AJ Bell, HSBC Savings, Ledger – Main.
- **Beneficiary (estate) chips:** Life-beat frequency, fallback email, package (Holdings + Docs) + one-line explainer.
- **Quick actions (buttons):** + Add asset, – Add liability, 📄 Import CSV, ✨ AI Import, 📎 Upload evidence, ⚙ Density.
All open demo drawers/lightboxes; nothing persists.

4.2 Header (sticky, top of content)

- **Search box:** Placeholder “Search instruments, accounts, documents...”.
- **Currency selector:** GBP / EUR / USD (demo only, no recalculation).
- **Status button:** “Reconciled” with green dot (static).
- **Export CSV** (no action) and **Print** (invokes `window.print`).

4.3 KPI row (6 tiles)

- Total portfolio (value + monthly delta).
- Liquid (cash + listed).
- Property (value + last updated note).
- Alternatives (value + sublabel “Crypto & private”).
- Unrealised G/L (absolute + % since cost).
- Rebalance status (e.g., “2 buckets out of band”, red delta).

4.4 Tabs & Content

A) Holdings Register (primary table)

- **One row per asset per wrapper.** Sticky header and sticky first column.
- **Columns:**
 - Asset (name + sublabel type)
 - Identifier (ISIN/ticker/custom)
 - Custodian
 - Wrapper (tag: ISA/SIPP/GIA/Personal)
 - Units
 - Cost (GBP)
 - Price
 - Value (GBP)
 - Return (IRR/TWR – demo text)
 - Bucket (e.g., Global Equity, Cash, Property, Alternatives)
 - Tax/Relief (e.g., Accumulating, CGT, “Ethereum” chain tag, or EIS/SEIS badge)
 - Evidence (status pill: On file / Valuation due / On-chain verify)
 - **Completeness** pill: % + small bar (metadata + evidence + freshness)
 - Actions (ghost button **View** → opens drawer)
- **Example rows to include:**
 - Listed equity fund in **ISA** (complete).
 - Global bond ETF in **SIPP** (95% complete).
 - Cash account in **GIA**.
 - Property (BTL) in **Personal** (valuation due).
 - BTC in **Personal** (On file).

- ETH wallet (On-chain verify).
- Private equity **EIS** with **countdown chip** (“~603 days left”).
- **Footer:** small totals line (informational).

Holding detail drawer (Listed)

- **Left card (Position):** Units, Price, Market value, Cost basis, Unrealised G/L (green/red), Bucket.
- **Right card (Compliance):** Evidence state, Tax treatment, Valuation date, Identifier.
- **Secondary block (Targets & bands):** Target %, Current %, “Status” line.
- **Performance (demo):** IRR since inception, TWR 1y, since last top-up.
- **Close control:** “X”.

Property detail drawer

- **Valuation sparkline (mock),** LTV/Yield (text), Compliance (EPC/insurance/title), Reminders (e.g., boiler service date).

B) Targets & Bands

- **Allocation bars** per bucket: title + small subtext (“Target X% • Band A–B%”), meter bar reflecting current %, a commentary line:
 - Example: “Global Equity — Current 46% — +6% over → Suggest sell £7,200 from ISA fund.”
- **Suggested actions** list (3 items).

C) Transactions

- **Table columns:** Trade date, Action, Identifier, Asset, Units, Price (GBP), Fees, Tax, Net amount, Broker, Wrapper, Evidence (e.g., Contract note).
- **Note:** one paragraph about auditability (e.g., Section 104 pooling context).

D) Documents

- **Tiled cards** with title, meta (type, uploaded date, coverage note).
- Clicking a title opens a **lightbox** mock (PDF frame placeholder with header).

E) Reconciliation

- **3 status cards** (Vanguard ISA, AJ Bell SIPP, Trading 212 GIA) with:
 - Status chip (Reconciled/Pending), Period, Statement (On file/Missing), Differences (value or —).
- **What's missing** panel (dashed border) listing 3–4 actionable gaps.

F) Household

- **3 bars** (Personal, Spouse, Ltd) with ownership %, simple meter, and a short note.
- **Household notes** card with two bullets on how to enable roll-ups.

5) Add / Intake Screens

5.1 Creative Intake (Kubera-style)

- **Hero header actions:** ☰K Command Palette, ✨ AI Import, 📄 CSV, Close.
- **Tabs:** “+ Add asset” | “– Add liability”
- **Category tiles (3-wide):** Listed, Cash, Crypto, Property, Private equity, Alternatives.
 1. Soft ambient glow, micro-hover lift, large emoji/SVG corner icon.
- **Stepper panel (right below tiles):** 3 steps with progress bar:
 1. **Identify** (e.g., ISIN/ticker, Wrapper, Custodian)
 2. **Amount** (Units/Price or Value)

3. **Evidence** (statement note)

(Buttons: Back | Continue — static in demo)

- **Command palette** (⌘K / button): overlay with a filter bar + list of quick actions (add listed, add cash, add crypto exchange/on-chain, property, private equity, AI import, CSV).
- **Liabilities (separate section, same feel)**: Mortgage, Loan, Credit card, with a **Details** → **Repayments** → **Link to asset** stepper.

6) Data shown (for demo copy only)

- **Holding row fields**: name, type sublabel, identifier, custodian, wrapper tag, units, cost, price, value, return text, bucket, tax/relief/EIS badge or chain tag, evidence status, completeness %, action.
- **Transactions fields**: date, action, identifier, asset name, units, price, fees, tax, net amount, broker, wrapper, evidence.
- **Document card fields**: title, type, uploaded date, coverage note.
- **Reconcile card fields**: institution/acc, status, period, statement state, differences.

7) Microcopy & States

- **Evidence states**: On file (green), Valuation due (amber), On-chain verify (green text label), Missing (red if used).
- **Completeness**: 80–100% with small bar; static values ok.
- **Targets copy**: “Target X% • Band A–B%”, “Current Y% • In band / +Z% over → Suggest ...”
- **Empty states**: If needed, show one sentence (“No documents yet.”) with a ghost button to the relevant quick action (opens demo drawer).

8) Acceptance Criteria (for the demo)

- Sidebar, header, KPIs, and all six tabs render exactly as described.
- Holdings table shows **7+** sample rows covering: listed fund (ISA), bond ETF (SIPP), cash (GIA), property (Personal), BTC, ETH on-chain, private equity (EIS with countdown).
- “View” opens the correct **detail drawer** (listed & property variants).
- “Upload evidence” opens a **documents lightbox** mock.
- Reconciliation tab shows two **Reconciled** and one **Pending** card + “What’s missing” list.
- Household shows roll-up bars and a notes card.
- **Both Add screens** open as standalone pages and match specs above.
- Print view strips chrome and outputs a clean light theme for the register.
